## An Enchanted Farming Adventure!

Return to Forget-Me-Not-Valley for another fantastic farming adventure with all your favorite Harvest Moon characters and a few new ones!

It's not easy being legendary and magical, especially if you have a rival who is just as powerful but far more popular. That's probably why the Witch Princess put a spell on the Harvest Goddess, although she didn't mean to take it this far. Her spell was only supposed to prevent the Harvest Goddess from being so cheerful and not petrify her or even banish her to another world.

Now it's up to you to restore the magic of Forget-Me-Not Valley. Seek out all 101 Harvest Sprites as you plant fields, tend livestock and find the right wife to share your farming dreams!

## Features...

- Plan, design and build a custom farm!
- Play Harvest Sprite Casino Games!
- Marry a maiden, mermaid, witch or goddess!
- Spend some hands-on time with your livestock and pets through innovative Touch Screen features!
- Water and harvest an extensive variety of crops on your own or hire Harvest Sprites to lend a hand!
- Court and marry local girls or invite over favorites from Harvest Moon: Friends of Mineral Town!
